

Description

This receptacle BOSA is a high performance optical sub-assembly in single fiber by using 1310nm transmitter and 1577nm receiver.

The transmitter section uses a multiple quantum well 1310nm DFB laser supporting burst-mode operation. The receiver section uses a TO-can built in a long wavelength APD chip and a 10Gbps trans-impedance amplifier. High optical isolation and reflection free is achieved by using CWDM filter and optical isolator.
